Frame Freeze Crack + Keygen Full Version

Frame Freeze is the perfect tool for capturing the screen contents of your Windows computer. Capture a single window or select an area of the screen without having to save as a JPEG or TIFF file. Just select the area you want to capture, and you're on your way. Grab a selected area of the window and use the frame freeze capture button to save as a JPEG or TIFF file. Image orientation is preserved during capture. The capture window is customizable. There are many options, including a setting to automatically save the capture to the clipboard when done. The captured window can be any size, a square, rectangle, or an arbitrary shape. The background is automatically set to the Windows desktop. Save the captured image as a JPEG or TIFF file. The result captures a small (3.5" w x 4.5" h) thumbnail of the captured window. These thumbnails can then be dragged and dropped from the system tray area to the application that contains the captured window. Capture the contents of any window on your Windows system. Select an area or the entire window and capture the contents to save as a JPEG or TIFF file. If you want to capture just the icons in a window, not the content, set the option to only capture icons. You can also draw your own image in the capture window, or use the frame freeze capture button to have it generate a thumbnail image. You can change the size of the captured area. There are many options, including a setting to automatically save the capture to the clipboard when done. Select a capture area size, and then select a save location and size from the list of options. You can also use the drag and drop function to select the image to be saved to the clipboard. Capture the contents of any active window. Capture an area of the current active window, instead of the entire window. The window edges are captured and preserved. There are many options, including a setting to automatically save the capture to the clipboard when done. Select a capture area size, and then select a save location and size from the list of options. You can also use the drag and drop function to select the image to be saved to the clipboard. Capture any active window by double-clicking on the preview image. Set the capture area size to only capture icons.
